TURBO MASTER LOK

ΕΝΕΡΓΟΠΟΙΗΤΗΣ

PRODUCT SPECIFICATION

TURBO MASTER LOK ΕΝΕΡΓΟΠΟΙΗΤΗΣ

Description

This product is an aerosol applied cyanoacrylate accelerant, which once applied to a difficult to bond substrate, significantly increases the cure speed of cyanoacrylate adhesive. The product is used primarily on wood mitre joints or on porous, acidic or difficult to bond surfaces.

It can also be used on uPVC, but care is required, as excessive use may cause discolouration on the uPVC surface. A patch test on a hidden surface is recommended where discolouration may be an issue.

Directions For Use

Ensure both surfaces to be bonded are clean, dry and free from grease.

Lightly spray one the surfaces to be bonded with the activator. If the applied activator is running off the substrate as a liquid, too much has been applied and may lead to discolouration or staining of the surface.

Allow the activator to dry.

Apply a thin layer of the cyanoacrylate to the other surface.

Bring both surfaces together to achieve a bond. Depending on the substrates being used and temperature a rapid bond will be typically formed in 2-10seconds.

Storage and Shelf Life

The activator should be stored between 5 and 30 degrees centigrade, away from direct sunlight. The aerosol has 12 months shelf life.

Health and Safety

Extremely flammable. Keep in well ventilated place away from sources of ignition. Do not breathe vapour or empty in drains. Do not pierce or burn after use.

**For further Health and Safety information - see separate MSDS sheet.*
